

TBAA03-16 Carrying Handles

The TBAA03-16 carrying handles can be used to move the subrack once it has been unpacked. The handles fit into the holes in the sides of the subrack, as shown below.

 **Caution** A subrack complete with modules can weigh up to 62lb (28kg). To prevent personal injury and damage to the equipment, we recommend that two people carry the subrack. In all cases follow safe lifting practices.
